

AMAN JAISWAL

Bengaluru, Karnataka, India | 8922068056 | amanmaadad@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Software Engineer / Full Stack Developer (Fresher) with a strong foundation in MERN stack development and backend systems. Experienced in building end-to-end web applications, RESTful APIs, and secure authentication workflows through hands-on projects. Proficient in problem-solving using Data Structures and Algorithms, with working knowledge of data analysis, data handling, and basic visualization, while actively expanding skills to build scalable, future-ready solutions.

SKILLS

- **Programming Languages:** Java, JavaScript, Python
- **Frontend & Backend:** React.js, HTML5, CSS3, Bootstrap, Material UI, Node.js, Express.js, Spring Boot
- **Data Analysis & Visualization:** Pandas, Exploratory Data Analysis (EDA), Data Visualization, Power BI
- **Databases & Tools:** MongoDB, MySQL, Git, GitHub, Docker, GitHub Actions, Jenkins
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

EXPERIENCE

Mphasis Ltd. — Associate Software Engineer Intern

Bangalore, India | February 2026 – May 2026

- Cleaned and analyzed sales data using Python (Pandas), handling missing values and duplicates
- Derived key business metrics such as Total Sales and Profit for deeper analysis
- Performed product-level and region-wise analysis to identify top-performing and underperforming segments
- Conducted advanced Region × Product analysis using heatmaps to uncover hidden sales patterns
- Built an interactive Power BI dashboard with KPIs (Total Sales, Profit, Orders), bar charts, pie charts, and heatmap visuals
- Identified that ~70% of revenue is driven by top 3 products, highlighting key business drivers
- Delivered actionable insights such as most profitable regions and high-performing product combinations

PROJECTS

TeamIssue & Task Management System | [GitHub Link](#)

- Designed and developed an end-to-end issue tracking and task management web application using React, Node.js, Express, and MongoDB, implementing clean REST APIs and a modular backend architecture.
- Implemented secure JWT-based authentication with role-based access control (Admin, Manager, Member), along with a complete issue lifecycle, Kanban workflow, threaded comments, and in-app notifications to enable controlled workflows, real-time collaboration, and reliable status tracking.

AI-Based Indian Sign Language (ISL) to Hindi Text & Speech Translation System | [GitHub Link](#)

- Contributed to backend development of an AI-assisted ISL translation system, focusing on data handling, API workflows, and preprocessing pipelines to support model inference and application logic.
- Collaborated with the team to design system architecture and ensure seamless integration between frontend, backend, and ML components.

EDUCATION

Master of Computer Applications

Presidency University, Bengaluru, Karnataka

- CGPA: 9/10

Sep 2024 - June 2026

Bachelor of Computer Applications

University of Lucknow, Lucknow, Uttar Pradesh

- Overall 74%

Oct 2021 - June 2024

CERTIFICATIONS

- **Frontend Developer (React) Certification – HackerRank:** Validated proficiency in React.js, component-based architecture, and frontend problem-solving skills.
- **HackerRank Software Engineer Certification** – Covering problem-solving, data structures, algorithms, and core software engineering concepts.
- **AWS Cloud Practitioner** - Covering core Cloud concepts, AWS services, and industry best practices.
